

# HomeSpa

## Key points installation instructions

Before you begin installing the HomeSpa, take into account the following points. For the full instructions, please refer to the installation manual online.

*You can download the full installation manual from [www.hamwells.com](http://www.hamwells.com)*

### **NOTE! Consider these issues when you install the HomeSpa.**

1. It is important to place the water connections at the correct height. Keep in mind that the hot and cold water connections are properly connected.
2. A 230 VAC connection is required for the main switch.
3. Keep in mind that the HomeSpa is placed just at the proper height.
4. An ethernet connection is required.
5. Always install the HomeSpa in proper order. Specifically for the built-up versions, it is important to finish the walls before placing the reservoir.
6. The maximum permissible pressure of the system is 3.0 bar.
7. Specify the water hardness.
8. Take into account a minimum slope of 1%.
9. Hot water supply must be at least 60 °C.

---
