Before your HomeSpa is installed, make sure that your bathroom meets these pre-installation requirements.

Which HomeSpa do you want?

Wall model (reservoir)
Unit mm

The connections are in the right place

Wall model (reservoir)
Unit mm

The connections are in the right place

Does your bathroom meet the 7 points below?

- The power supply connection is in the right place, is at least 5A insulated, grounded and has a grounding circuit breaker.
- Your hot and cold water connections are in the right place and are provided with a 1/2 "external connection.
- Your hot water supply is at least 55°C, maximum 3 bar and can provide at least 0.5 liter / min.
- The Ethernet connection is provided with a RJ45 plug and placed in the power supply connection.
- Your drain has a siphon for a 50 mm connection, is in the right place and runs flat with the underfloor.
- Your bathroom is at least 230 cm high and is easily accessible to our installer.
- The bathroom should be completely finished, including tiling.

If your bathroom meets the above points, your Hamwells installer can install your new HomeSpa!
