### English

## 1. Safety Instructions

- Please read the safety instructions and quickstart guide before first use.
- Users must be qualified to handle the devices and be aware of the hazards potentially associated with the process. Never allow children or incompetent persons to use the Loopz without supervision.
- Please consult your doctor before using the Loopz in case of allergies, if you are susceptible to infection or if you have doubts about your health.
- When adding hot water to the water tank, please check the water temperature. Do not exceed a maximum temperature of 60 °C to prevent burns!
- Please note, the recycled water of the Loopz is not drinking water. We strongly discourage drinking the water.
- Check if the local mains voltage is compliant with the stated voltage of the Loopz (see 2.2 Specifications).
- Before using the Loopz, please check if the connectors are plugged in correctly to ensure a watertight connection.
- Caution, serious damage can be caused to your device if you do not use the original adapters or extension cables.
- Caution, improper use of the Loopz can cause damage to the product.
- Repairs may only be executed with original spare parts and accessories.
- Do not use your Loopz if there is any sign of damage to the product (or to a related product). Please contact the supplier.
- The Loopz Plus contains a UV-C LED. If the LED casing has been damaged, please do not use the Loopz. Direct exposure to UV radiation can cause damage to eyes and/or skin.
- Place the Loopz on a flat, even surface to avoid instability.
- Beware of crushing hazards when positioning the Loopz because of its weight (10kg / 22lbs).
- Beware of pinching hazards when installing the control panel and filter, the rim of these parts may be sharp.
- Do not use the Loopz when the water tank is empty, this may cause damage to the electrical components.
- Fill the water tank to the indicated level to ensure the pump functions properly.

- Always clean the filter before using the Loopz. Clean the filter with an external water source to avoid any obstructions in the system.
- Drain the water after each use to prevent the growth of bacteria and fungi.
- Please note that water containing chemicals, such as soap, should not be released into the environment.
- Let op dat water waar chemicaliën in opgelost zijn, zoals zeep, niet in het milieu worden achtergelaten.

## 2. Description and Function

### 2.1 Intended use of the product

The Loopz is a circulation shower designed for outdoor use. The Loopz functions as a conventional shower, however the water usage is limited thanks to filtering the water and reusing it. The Loopz is available in two versions, Loopz Basic and Loopz Plus. Both models use a sediment filter and a micro filter. The difference between these two is the built-in UV-C LED to expand the filtration process. If the product is maintained as described (see 3.1 cleaning procedures), the Loopz has a one year manufacturer's warranty. This warranty is void if the product is damaged by improper use.

### 2.2 Specifications

703 x 703 x 100 mm / 27.67x27.67x4"  
 10 kg / 22lbs  
 12VDC input SELV  
 45W max. power consumption  
 IP68 connectors

## 3. Maintain

### 3.1 Cleaning procedures

We recommend cleaning the Loopz parts with mild detergents according to the following schedule.

Microfilter	After each use
Water tank	Weekly
Control panel	Weekly
Pump*	Weekly
Deck	Weekly
Shower Head	Monthly

- \* Add a mild detergent to the water tank. Let the shower run for a few minutes and empty the reservoir afterwards. Again, fill the water tank and let te shower run. Do not add a detergent the second time.

### 3.2 Storage and transport

Keep the Loopz dry and clean. Transport the product horizontally to avoid any damage to Loopz' components. Please tie down the different parts using the supplied strap.

## 4. Disclaimer

We reserve the right to make changes to products and documentation as may be required for technical progress and continuous improvement and therefore, there may be deviations from the information in the catalogue. Printing errors excepted.

## 5. WEEE Directive

Registration & disposal of electronic products in accordance with the WEEE Directive.

## 6. CE Mark

Hamwells Nederland B.V. ensures that the product complies with the European basic standards and guidelines
