Innovative products for your bathroom

Hamwells®

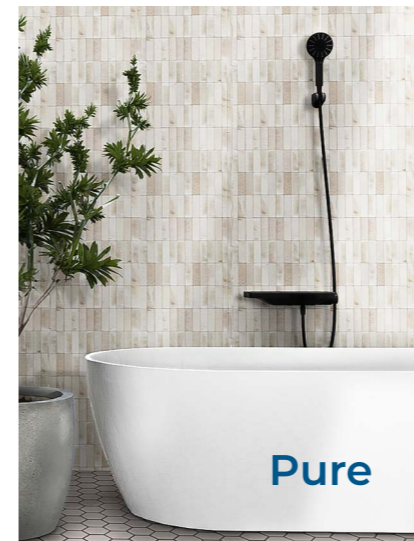

The Collection

Great Savings, Great Comfort

Discover our collection where sustainability meets comfort. Our innovative solutions are designed to reduce your bathroom's water and energy usage without compromising on style or functionality.

Consider upgrading your bathroom with the Sense tap featuring its SmartWater technology, or significantly cut your energy consumption with the Blue shower system.

Blue 21

WWHR Shower system including black glass panel and black thermostat

Sense Display

Black Sense tap including SmartWater technology and LED signal

Pure Four

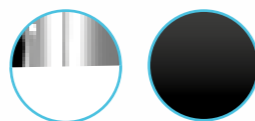

Specifications

- Thermostatic valve module
- Four features:
Rain shower, Hand shower,
Bidet hand shower, Bath faucet
- Rain shower fixture
- Adjustable holder for the
hand shower
- 120cm + 150cm shower
hoses
- 27x12x4.5cm
- 15cm center distance

[Shop online.](#)

Color Options

All Pure products are available in
chrome / white or black.

Features

The Pure Four set offers a complete functionality for your bathroom. This set includes a bath faucet, hand shower, bidet shower and of course a rain shower, allowing you to enjoy various comfortable options.

The hand shower has multiple settings. Enjoy a water saving mist shower, massage jets, a powerful waterfall shower, or a combination of the massage and waterfall function.

Design

The design of the Pure Four is very elegant, featuring rounded edges and a smooth cut-out to hold the bidet shower spray. The set is available in two colors: chrome/white or black. Easily match the set with your bathroom!

In addition to its elegance the module even serves a dual purpose. It is designed with the user in mind, providing space for placing soap and shampoos.

Keypad Controls

A characteristic feature of the Pure series is the keypad control. You can easily switch between different usage modes. A very intuitive design which makes this shower suitable for all ages.

Another convenient option is the possibility to use the features, like the hand shower and bath faucet, simultaneously if your water pressure allows.

Pure Three

Specifications

- Shower mixer module
- Three features:
Rain shower,
Hand shower incl. 4 settings,
Bath faucet
- Rain shower fixture
- Adjustable hand shower holder
- 150cm shower hose
- 27x12x4.5cm
- 15cm center distance
- 1/2" water supply connection

[Shop online.](#)

Features

Searching for ultimate comfort? The Pure Three set includes a soothing rain shower, a bath faucet, and a hand shower. Like the other Pure sets the hand shower has four settings (mist, massage jets, waterfall, combo) to adapt your shower experience.

Create Comfort

The shower set comes with a fixture and adjustable holder. Therefore, you will be able to set the angle and height for even more comfort.

The distinctive keypads are very user-friendly.

Pure Bath

Features

The Pure Bath comes in handy when you need a tap for your bath. This set includes a bath faucet and hand shower, allowing you to enjoy a relaxing bath or a refreshing shower.

The Pure Bath's hand shower also has four settings (mist, massage jets, waterfall, combo) to adapt your shower experience. Please note, the hand shower is not adjustable in height or angle for the Pure Bath.

Specifications

- Shower mixer module
- Two features:
Hand shower incl. 4 settings,
Bath faucet
- 150cm shower hose
- Holder for hand shower
- 36x13.5x5.5cm
- 15cm center distance
- 1/2" water supply connection

Pure Display

Specifications

- Thermostatic valve module
- Four features:
Rain shower,
Hand shower,
Bidet hand shower,
Bath faucet
- Rain shower fixture
- Adjustable hand shower holder
- 120cm + 150cm shower hoses
- 27x12x4.5cm
- 15cm center distance
- 1/2" water supply connection

[Shop online.](#)

Features

This mixer tap module has four functions and even a LED temperature display. Of course the hand shower also has various settings (mist, massage jets, waterfall, combo). Installation is very easy, the display functions based on water pressure.

Save Energy

Thanks to the temperature display, you can easily check your water temperature and increase awareness of your energy consumption.

Sense LED

Easy Control

Control your faucet with a simple motion. The Sense LED is extremely user-friendly thanks to the hands free design and the indicative LED to show the water temperature. Another benefit is that you'll reduce your water consumption using the SmartWater technology.

SmartWater Technology

The SmartWater technology is one of the features of the Sense LED. Since the mixer tap is equipped with two motion sensors, your movement is easily recognized. One sensor is for a direct on/off response. The other sensor can be used for a continuous stream of water, which is a handy when filling a bucket.

This innovative design helps you to prevent unnecessary water and energy consumption.

Specifications

- Deck mounted tap
- LED to indicate the water temperature
- SmartWater Technology incl. two motion sensors
- 18x5.5x14.5cm
- 1/2" water supply connection
- Battery powered

Sense Display

Innovative Design

Unique features like the SmartWater Technology and the temperature display makes the Sense Display one of a kind. Lower your water consumption and create convenience & style for your bathroom.

Eco-Conscious

The integrated display on top of the tap allows you to easily monitor the water temperature. The Sense Display improves awareness and helps you manage your hot water consumption efficiently.

Furthermore, the SmartWater Technology will reduce your water usage. There is no unnecessary water flow thanks to the quick sensor response.

Specifications

- Deck mounted tap
- LED temperature display
- SmartWater Technology incl. two motion sensors
- 18x5.5x14.5cm
- 1/2" water supply connection
- 34mm mounting hole
- Battery powered

Blue HE

WWHR Shower system including white glass panel and chrome thermostat

Sense Display

Chrome Sense tap including SmartWater technology and temperature display

Blue

Energy Saving Shower

For several years, the Blue is one of the key products designed by Hamwells. This wastewater heat recovery (WWHR) system reuses the residual heat from the shower wastewater. The most efficient version of the Blue achieves an efficiency up to 72,5%! Improve your bathroom and lower both your environmental impact and your energy bill.

Comfort

A sustainable shower doesn't mean sacrificing comfort. The Blue can handle a regular water flow. So both a luxurious rain shower head as well as a water saving shower head can be used. It's up to your preference!

Specifications Blue 21

Various lengths of the Blue series are available, each with different efficiency levels. Below are the specifications for the Blue 21:

- Blue 21 includes a single WWHR pipe, pump, sensor, power supply, glass panel, thermostatic mixing valve
- 38x15x208,5cm
For installation a minimum height of 240cm is required
- Blue 21 incl. glass panel – 20,4 kg
- 62,5% efficiency for a water flow of 9,2L / min
- Power input:
Standard use max. 42W
Standby <1W
90 – 305VAC, 12VDC
- Automatic overcurrent and surge protection

[Shop online.](#)

Sustainable Solution

The WWHR technology reduces the amount of hot water, which means your hot water supply (such as an immersion heater) won't need to work as hard. This naturally results in lower energy consumption and therefore lower carbon emissions.

Additionally, the system is designed so that individual parts can be easily maintained or replaced. This means the system has an impressive lifespan.

Low Maintenance

All of the Blue's components are of industrial quality. Local regulation might require the check valve to be periodically checked. The glass panel serves as a maintenance hatch and provides easy access when needed.

Color Options

The Blue is available in various color combinations. You can choose between a chrome or black thermostat. For the glass panel, you can select either white or black.

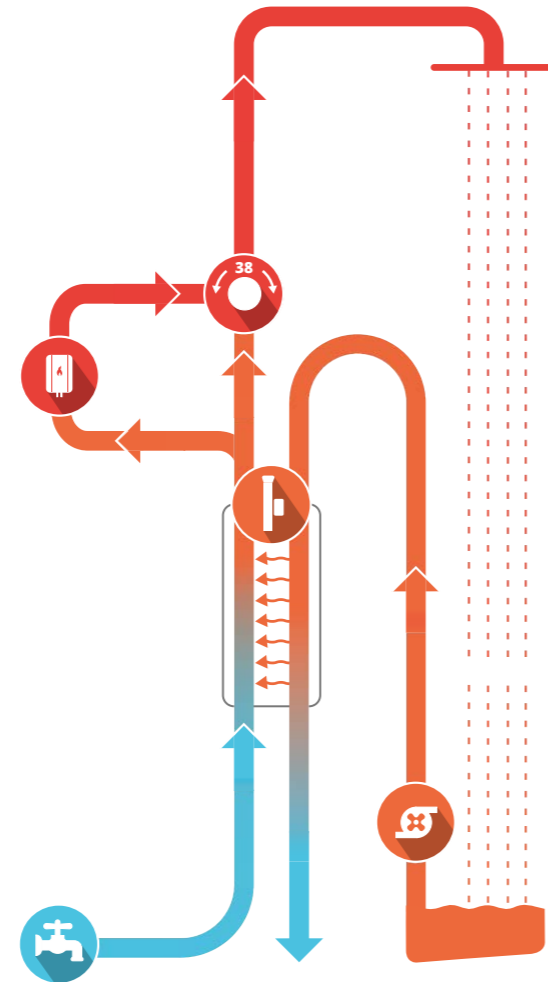

Waste Water Heat Recovery

How is the heat reused?

The Blue captures the wastewater in the drain, where it is detected. A highly efficient pump then pushes the wastewater to the WWHR unit.

In this unit, the residual heat from your wastewater is transferred to your cold tap water before the wastewater is drained.

Finally, the preheated cold water reduces the need for hot water to maintain your desired shower temperature.

FAQ

Do you still have any questions about the Blue's functionality?
